

## *Position: Lead UI/UX Designer*

WBS Technology is a fast-growing startup in the IoT space. We empower building managers and building owners to commit to sustainable building operations by delivering new data insights and automation capabilities through our Plexus mesh network technology.

We're looking for a passionate individual looking to make an impact, with experience designing web and mobile applications. WBS Technology is in the process of redesigning our EMIoT system, as well as launching some exciting new products.

As our lead UI/UX designer, you'll be given a large amount of creative control to design and reimagine our web and mobile apps. You'll be involved in every step of the creative journey, from product strategy and ideation to implementation.

Working alongside our small but growing team, you'll be expected to wear multiple hats and will have the opportunity to experience a wide variety of challenges.

### *What we're looking for:*

At least 3-5 years experience designing software applications

Ability to participate in all stages of the design journey, from product strategy to implementation

Experience working embedded in a team, with excellent communication skills. You can convey the idea behind your design decisions and present clear specifications for your design vision.

Flexibility and being able to react quickly to changes in the market and user requirements

Willingness to step out of their comfort zone and learn new skills in related areas
